Mission

Georgia Power is committed to preserving the scenic, environmental and recreational value of the lakes.
General Guidelines

- A valid lease agreement (GP lots & Access lots), license (deeded lots) or Multi-Use License Agreement is required in order to receive permits for construction on GP lakes and property. A current survey and/or deed are required before GP will issue any new agreement (license, access lease, etc.).

- Maximum dimensions found herein are a general standard, not a guarantee. Each permit request is handled on a case by case basis at the discretion of the GP Land Management Office.

- A GP permit must be applied for and issued before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land.

- A permit should be posted and be visible from the lake and/or road. Failure to post permit could result in work stoppage.

- All permits will have an approval date and a completion date. These dates are recognized as the starting date of the project and the expiration date of the permit. If construction will continue past the permitted completion date then a permit extension is required.

- Any changes in plans, after initial approval of construction, must be reviewed and approved by GP before change is executed.

- Unauthorized construction activities or failure to comply with GP’s permitting process may result in construction delays, removal of unauthorized project, sterilization of shoreline, termination of lease/license and/or legal action.

- Regarding property lines: There is a minimum fifteen-foot setback from side lot line or any such extended imaginary lot line as determined by extending line lakeward. The imaginary line, extended lakeward, will be recognized by GP on a case by case basis. It is not reasonable to expect this extended line to be feasible in all cases.
• To protect the vegetative buffer surrounding the lake, no mechanical clearing shall be permitted within 25 feet of the shoreline or county setbacks, whichever is greater.

• Any ground disturbing activities shall require the proper installation of silt screen at least 26 feet from the shoreline or as determined by the GP Land Management Office and local county ordinances.

• Generally, older structures that do not conform with current policies or guidelines may be maintained, but not expanded or replaced. GP may require modification of these old structures to conform with current policies or guidelines, prior to transfer or renewal of a lease/license agreement or approval of other construction activities.

• It is the responsibility of the homeowner to properly dispose of any shoreline structure/s that have been replaced or removed.

• All construction adjacent to or within GP lakes shall be maintained in a good state of repair and shall comply with any and all federal, state, and local health and safety regulations as now or hereafter enacted.

• Dumping, burying or otherwise disposing of any portion of a downed tree on GP property or into the lake is prohibited. The disposal of leaves and lawn clippings into the lake is also prohibited.
How to obtain a GP Construction Permit

1 Read and be familiar with the guidelines in this booklet.

2 Contact GP’s Land Management Office for instructions on obtaining a permit.

3 Each permit request is handled on a case by case basis at the discretion of GP Land Management Office.

4 A valid GP lease agreement or license is required in order to receive permits for construction of GP lakes and property.

5 Submit your application containing the following information to the GP Land Management Office. Depending on the scope of the project, GP may require additional information before issuing a permit.

- Name
- Lake lot address (lot number/area number, if available)
- Phone number(s)
- Drawing of the proposed project
- Dimensions
- Distances from side lot lines
- Materials to be used
- Contractor’s name and phone number
- Expected start date and completion date

NOTICE: It is the responsibility of the homeowner to make sure that all permits are obtained and properly posted before work begins.
This booklet provides information and guidance to homeowners, prospective buyers, builders, realtors, and other interested parties regarding shoreline development on Georgia Power’s (GP) lakes. The purpose of the booklet is to present a sound, consistent position on this development while protecting the environmental and aesthetic qualities of the lake. Above all else, the information in this booklet is intended to comply with all legal requirements — from our Federal Energy Regulatory Commission (FERC) license to all federal, state and local laws and regulations.

The proper management of shoreline development must balance the interests of a number of stakeholders and is vital to the life of the lake. It is our hope that communicating the guidance in this booklet will ensure that we will all enjoy the many beneficial opportunities the lakes afford for years to come. We ask that you read all the information contained in this booklet and that you call us if you have any questions.

Thank you for your interest in the GP lakes. We look forward to working with you to make your lake experience an enjoyable one.
Mission

Georgia Power is committed to preserving the scenic, environmental and recreational value of the lakes.
Each permit request is handled on a case by case basis at the discretion of GP Land Management Office.

Dredging plans must be submitted and approved before work begins.

By obtaining a dredging permit from GP, the permittee agrees to:

1. Abide by all governmental rules, laws, regulations, directives and statutes.
2. Acquire all necessary governmental permits or licenses, which may include, but shall not be limited to, a soil disturbing activity permit.

Applicants must provide the volume of material to be removed. A qualified engineer or surveyor should determine this information (especially for large projects over 400 cubic yards). An estimate sheet is to be attached to the permit request.

Removal of original lake/river bottom is prohibited. The sole purpose for dredging is to remove silt or sedimentation that has accumulated over time.

The material removed from the lake shall be disposed of in upland area so as to avoid re-entry into lake.

Regarding deeded property, a property line agreement shall be executed prior to dredging activity to establish pre- and post-dredging property rights.

• GP is authorized to permit dredging of up to 500 cubic yards per lot. Greater amounts will require approval from U.S. Army Corps of Engineers, FERC and additional agencies.

• Information contained herein is subject to change without notice.
• Tree removal requires a written permit.

• Written approval from the local issuing authority (county) may be required if removing a tree from the lake side of the dwelling.

• To protect the vegetative buffer surrounding the lake, no mechanical clearing will be permitted within 25’ of the shoreline.

• Tree removal is prohibited without a valid reason.

• Removal of trees may require a re-vegetation plan. GP promotes a 1 for 1 tree replacement policy (nursery grade). Native trees and hardwoods are recommended.

• GP reserves the right to receive reimbursement for merchantable timber.

• Tree removal is the responsibility of the homeowner.

• Tree removal requests must be accurate regarding the number of trees to be removed and detailed regarding process and disposal.

• If tree removal involves significant earth disturbance, proper erosion and sedimentation controls must be followed, including installing a silt fence to protect shoreline and re-vegetative plan.

• For land disturbances of 11 acres or greater: A copy of the county’s land disturbance permit is required in order to receive a permit from GP.

• All portions of the tree/s (limbs, stump/s, etc.) must be properly removed from the lot. Dumping, burying, or otherwise disposing of any portion of the tree on GP property, lease lots, or lake is prohibited.

• The disposal of leaves, grass clippings or other yard debris into the lake is prohibited.

• Each permit request is handled on a case by case basis at the discretion of GP Land Management Office.

• A valid GP lease agreement or license is required in order to receive permits for construction on GP lakes and property. • A GP permit must be applied for, issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land.

• Information contained herein is subject to change without notice.
residential shoreline use

The requirements listed below are part of the GP shoreline management guidelines and are intended to protect and enhance the scenic, recreational and environmental values of the lake, and to be compatible with the overall lake project recreational use.

New lots

- A newly created residential lot must have a minimum lot width of 100’ of shoreline and must recognize GP’s existing shoreline property right. Shoreline footage from adjacent, existing lots may not be used to meet the 100’ length for a new lot if the overall result is that either or both of the adjacent, existing lots have less than 100’ of shoreline. This 100’ width requirement must extend back from the shoreline of a depth and configuration that is acceptable to GP. Lots that would impact the environmental features of the lake (i.e., wetlands, vegetative buffers, etc.) or that do not comply with federal, state, or local rules or regulations will not be authorized for shoreline structures. Final determination of the required 100’ of shoreline is at the discretion of the GP Land Department Representative.

- Certain lot configurations, such as pie shaped lots, whose side lot line projections across GP property towards the lake results in less than 100’ of shoreline will not qualify for any shoreline structures.

- No shoreline structures will be permitted on a deeded or leased property without a single family residence being established prior to the construction of the shoreline structures. GP may require a recorded plat for deeded property prior to issuing any shoreline structures to ensure compliance with the shoreline footage requirement.

Established Lots

- An original lot that was created as part of an established subdivision prior to GP’s shoreline management guidelines will be allowed to maintain shoreline structures with less than 100’ of shoreline, unless the lot is split, altered or reconfigured in any way. The construction

continued
Each permit request is handled on a case by case basis at the discretion of GP Land Management Office. A valid GP lease agreement or license is required in order to receive permits for construction on GP lakes and property. A GP permit must be applied for, issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land.

Information contained herein is subject to change without notice.

Commercial and Off-Shore Developments

- Permits for shoreline structures are intended to be used for single family, residential dwellings only, with the exception of authorized marinas. The use of permitted shoreline structures for commercial purposes or for access by off-shore developments is incompatible with the overall lake project recreational use. The single family, residential dwelling must be adjacent to the shoreline and meet the shoreline requirements listed above. Permits for shoreline structures for single family residential use may not be converted to use for commercial developments or for off-shore development areas. The unauthorized use of these shoreline structures will result in the cancellation of any existing agreement with GP and may result in the removal of the structures.

- Existing shoreline structures that were built prior to the shoreline management guidelines for commercial use or off-shore development use may not be expanded, altered or modified beyond the usage currently in place without prior authorization from GP.
• Only one residential dwelling is permitted on GP lease lots.
• Residential dwellings shall be limited to two stories above ground.
• New residential dwellings must be at least 900 square feet or county minimums, whichever is greater. Mobile homes are prohibited.
• New construction shall be constructed at least 75' from shoreline if located inside the GP project and at least 50' if outside the GP project. All other setbacks must meet county guidelines or 15' whichever is greater.
• The following information should be provided to GP prior to issuing a construction permit:

1. Architectural drawing/s, copies of plans from published plan books, or detailed sketches drawn by hand.
2. Applicant’s name, address, phone number/s, lot number and area number.
3. Name and phone number of contractor or individual doing construction.
4. Anticipated date of beginning and approximate date of completion.
5. Floor plan depicting length, width, square footage, and height.
6. A list of exterior construction materials to be used.
7. A description of roof system (roof must be shingle or baked enamel).
8. A description of exterior color scheme.
9. Drawing or photograph showing how the structure will look from the lake.
10. Drawing or photograph showing the side view of the structure.
11. Site plan showing distances between proposed structure and:
   a. both side lot lines
   b. back lot line
   c. closest point from shoreline

continued
Each permit request is handled on a case by case basis at the discretion of GP Land Management Office. A valid GP lease agreement or license is required in order to receive permits for construction on GP lakes and property. A GP permit must be applied for, issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land.

North Georgia Lakes

12 Site plan showing proposed location of the county approved septic tank, drain fields, and well plans.

13 All pertinent state and local permits including, but not limited to:
   a) Septic tank permit (if applicable)
   b) Building permit
   c) Clearing permit (>1.1 acres if applicable)

14 Site plan depicting approximate number and size of trees (4" diameter or greater) to be removed within the building perimeter, driveway, and septic tank and drain field lines.

- Underpinning is not required on structures.
- Chain link and decorative fences will be considered if the fence is located out of view from the lake, the primary road, and from the neighbor's properties.
- For land disturbances of 1.1 acres or greater: A copy of the county's clearing and excavation permit is required in order to receive a permit from GP.
- The following objects may not be attached to the exterior of residences or accessory buildings or structures that are located on land owned by GP, nor installed or placed on land or property owned by GP, without GP's prior written permission:

1. satellite dishes;
2. security or surveillance cameras;
3. stereo or sound systems;
4. free-standing flagpoles;
5. signs, placards, or banners with measurements greater than two feet by two feet;
6. statues, figurines, artwork, or monuments with a height or width greater than two feet; or
7. other objects that, in GP’s judgment, may restrict a neighbor’s view of the lake, may interfere with a neighbor's enjoyment of the lake, may be offensive to a reasonable person or inappropriate for viewing by minors, or may create a safety hazard or nuisance to persons using the lake or persons present on land owned by GP.

Each permit request is handled on a case by case basis at the discretion of GP Land Management Office. A valid GP lease agreement or license is required in order to receive permits for construction on GP lakes and property. A GP permit must be applied for, issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land. Information contained herein is subject to change without notice.
Outbuildings include but are not limited to detached garages, storage buildings, and greenhouses.

A maximum of two outbuildings per lot. This includes a maximum of one detached garage in addition to one attached garage (an attached garage is described as one that is directly adjacent to and attached to the heated primary residential dwelling).

Maximum dimensions of a detached garage: 30' x 30'.

Storage buildings other than detached garages shall be limited to 12' x 16' or 192 sq. ft.

Outbuildings should be located behind the dwelling and/or at least 75' from shoreline if inside the GP project or 50' from shoreline if outside.

Maintain the greater of county code or at least 15' setback from property lines.

All outbuildings should match the primary residential dwelling in color and design.

Detached garages must have a door large enough to accommodate an automobile and may not include temporary or permanent living spaces. Attic storage is permissible provided access is by pull down steps only. Plumbing, heating and cooling is prohibited.

- Each permit request is handled on a case by case basis at the discretion of GP Land Management Office.
- A valid GP lease agreement or license is required in order to receive permits for construction on GP lakes and property.
- A GP permit must be applied for, issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land.
- Information contained herein is subject to change without notice.

North Georgia Lakes

- All applicable state and local permits and variances must be obtained before constructing a new seawall.
- Due to changing environmental requirements, this document is to be used only as a guideline. Consult your local GP Land Management Office for current seawall regulations and requirements.
- Seawall construction will require proper erosion and sedimentation controls. After completion of seawall and until the vegetative buffer is restored, a silt fence must be installed and maintained just behind the new seawall at ground level.
- Plans should show the following:
  1. the length of shoreline to be fronted by the seawall.
  2. the type of foundation to be installed and depth below ground line.
  3. the type of materials to be used for construction of the seawall.
  4. the height of the seawall should be no higher than necessary to stabilize shoreline.
  5. a re-vegetation plan.
- The distance between the proposed seawall and the existing shoreline shall not exceed two feet. The location of the proposed seawall must be staked at 25' intervals for inspectors to assure the original contour is adhered to as close as possible. For very irregular shoreline, stakes shall be no more than 10' apart.
- GP requires placing rip-rap along the base of all seawalls. This application helps reduce undermining and restores shoreline habitat. Recommended amount from normal (full pool) water level: slope ratio of 1' of width per every 1' of depth.

- Each permit request is handled on a case by case basis at the discretion of GP Land Management Office.
- A valid GP lease agreement or license is required in order to receive permits for construction on GP lakes and property. A GP permit must be applied for, issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land.
- Information contained herein is subject to change without notice.
Each permit request is handled on a case by case basis at the discretion of GP Land Management Office. A GP permit must be applied for, issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land. Information contained herein is subject to change without notice.

- Regarding newly established lots or developments: A minimum lot width of 100' is required for all shoreline structures. Seawalls are the exception.
- There is a minimum 15' setback from side lot line or any such extended imaginary lot line as determined by extending line lakeward.
- Only one dock is allowed per lot.
- Docks may be floating or stationary or a combination of both. Only approved encapsulated or Dow Polystyrene flotation will be permitted for use with floating docks. Metal drums, plastic barrels, modified pontoon boats and other such items or materials are prohibited.
- The stationary platform of a dock, which is adjacent to the shoreline, may be covered; however, screening or enclosing the structure is prohibited.
- Docks cannot extend beyond other shoreline improvements, and should not exceed 50' in length from the shoreline.
- Maximum dimensions on any portion of a dock are 16' x 20'.
- The minimum width of walkway is 4'; maximum width, 6'.
- Walkways may be located in the middle (“T” or “I” shape) or to either side of the platform (Flag shape).
- Replacement of unapproved flotation may be required at the time of any dock renovation or replacement. Replacement of unapproved flotation will be required at time of lease/license renewal or transfer.

- Each permit request is handled on a case by case basis at the discretion of GP Land Management Office.
- A valid GP lease agreement or license is required in order to receive permits for construction on GP lakes and property. A GP permit must be applied for; issued and posted properly before beginning any construction, renovation, clearing, tree removal, grading, etc., on GP land.
- Information contained herein is subject to change without notice.
Wharves are considered an alternative when other standard or typical shoreline structures are either not functional, prohibited, or when special needs are present. Wharves will not be permitted otherwise. If permitted, a maximum of one wharf may be permitted per lot.

- Regarding newly established lots or developments: A minimum lot width of 100’ is required in order to have any shoreline structures. Seawalls are the exception.
- Wharf must be adjacent to shoreline and must be constructed for the purpose of connecting two structures. Maximum length of 16’ wharf is allowed with 125’ of shoreline or less.
- Maximum total width may not exceed 6’ over water. Minimum 4’.
- Total length may not exceed 30’. For lots with 126’+ frontage.
- Maintain at least 15’ setback from property lines.
• Regarding newly established lots or developments: A minimum lot width of 100’ is required in order to have any shoreline structures.

• There is a minimum 15’ setback from side lot line or any such extended imaginary lot line as determined by extending line lakeward.

• All shoreline improvements must be located as close as reasonably possible to the shoreline, and should not exceed 50’ in length from shoreline.

• Maximum exterior dimensions for a boathouse structure are as follows (dimensions are from post to post):
  
  Single Stall — 16’ wide in new guideline x 32’ long (overhangs: maximum of 2’ additional)
  Double Stall — 28’ wide x 32’ long (overhangs: maximum of 2’ additional)

• Sun decks may be covered or uncovered.

• Dock portion may be covered if boathouse does not have a covered second deck

• Sun deck may be enclosed as follows:
  
  1. Back portion may be a solid wall with windows.
  2. Front and remaining sides must remain open or screened at least 50%.

• Catwalks or suspended walkways may be used to access boathouse decks. These walkways may not be longer than 25’. Steps will be required for the distance remaining.

• Regarding newly established lots or developments: A minimum lot width of 100' is required in order to have any shoreline structures.

• There is a minimum 15' setback from side lot line or any such extended imaginary lot line as determined by extending line lakeward.

• A maximum of one double (2) stall structure is allowed (if no stall structure currently exists). Stall structures will be limited to any one of the following combinations:
  1 Single-stall wet storage, or
  2 Double-stall wet storage.

• All shoreline improvements must be located as close as reasonably possible to the shoreline, and should not exceed 50' in length from shoreline.

• Maximum exterior dimensions for boatslips are as follows (dimensions include walkways):
  Single – 22' wide x 36' long
  Double – 36' wide x 36' long

• The minimum width of walkway is 4'; maximum width, 6'.
